

The Lapua .260 Remington

Long before noted gunwriter Jim Carmichael wrote of his work with a .308 case necked down to accept 6.5mm bullets, this combination was quietly seeing some use in competitive circles. With relatively mild recoil and sufficient energy to reliably topple rams, it was a natural for the Metallic Silhouette game.

Offering ballistic performance similar to the venerable 6.5x55, this combination could deliver both flat trajectories and pin-point accuracy, giving it a broad appeal to both target shooters and hunters alike. Coupled with the truly superb range of bullets available in this bore size, it was no surprise to see Remington adopt the cartridge as the .260. But proof, as they say, is in the pudding; The .260 was used to stunning effect at Camp Perry to win the 2010 Championships setting an incredible new national record in the process. Since its introduction, .260 shooters have hammered their way into the winner's circles of a wide variety of competitive disciplines, a real testament to the capability of this outstanding cartridge.

Despite its incredible list of competitive victories, the .260 isn't just a target round. It has also shown itself to be a fine performer in the field for medium game.

Effectively duplicating the ballistic performance of the time-honored 6.5x55, the .260 has already developed a well-earned reputation for dependable stopping power on deer, antelope and similar game. Given the tremendous selection of bullets for every conceivable application, the .260 is an extraordinarily versatile cartridge. With such a solid history already established in such a short time, Lapua is proud to add the .260 to our line of premier components for the handloader.

With the .260 already a favorite of demanding competitive shooters, Lapua sets the standard even higher with the introduction of our new .260 brass. Superior Lapua metallurgy, outstanding uniformity and durability combine with our meticulous quality control to make this case the obvious choice for those requiring the ultimate in performance. Whether your goal is the championships at Camp Perry or a memorable hunting experience, the legendary Lapua quality can take you there!
