

Naturalis copper bullet

The Naturalis retains up to 100% of its weight. The valve at the tip of the bullet opens immediately on impact, leading the bullet to expand symmetrically and without shattering. This gives maximal shock effect.

The Naturalis cartridges have rapidly gained a faithful following among hunters of different kinds of game. They are extremely effective yet minimize meat loss. Naturalis has been used to hunt a wide variety of different kinds of game on all continents and weather conditions. Available in most popular hunting calibers.

- Controlled and optimized expansion, ideal penetration, powerful shock effect – not depending on the distance
- Solid and unbreakable construction, weight retention up to 100 %
- Unique Lapua technology
- A clean shot – minimized meat loss

Mega for big game

The Lapua Mega is for hunting big game. The Mega is at its best in the field and typically more than duplicates on impact, causing an immediate shock effect.

The Mega is a mechanically bonded soft point bullet with a protective copper jacket. This ensures that the bullet's lead alloy core remains intact when shooting through bushes or branches. The bullet also achieves a very high weight retention. The Mega product family covers the most popular calibers in Scandinavia.

- Very high weight retention
- Controlled penetration
- Controlled bullet expansion

Naturalis Mega

METRIC DATA
