Certified

Nammo Lapua Oy's quality system conforms with both ISO 9001 and AQAP 2110. We have also been awarded the ISO 14001 environmental system certificate.

Part of Nammo Group

THE BLUEPRINT FOR SUCCESS

Serious hand loaders and shooters seek to match the perfect cartridge to their firearm. The team here at Lapua understands this, and has made our "Passion for Precision" the blueprint for our success. We know that our precision crafted bullets and brass are just the beginning. We then combine those components using our depth of experience and state of the art manufacturing to produce ammunition that is unrivaled for its precision, consistency and downrange performance.

Competitive shooters, hunters and Mil/LE operators understand that cheap ammunition will never achieve their desired outcome. They insist on ammunition that produces unmatched accuracy, reliable ignition, optimized muzzle velocities and superior ballistics. Expect what professionals around the world trust and experience our "Passion for Precision."

Our reputation didn't happen accidentally rather, it's the result of decades of experience, combining the best materials and processes that yield super precise, ultra-consistent components and ammunition. Add our demanding quality assurance and inspection processes, and our world famous quality and reputation become apparent. Ask any avid shooter about Lapua components and ammunition and they'll tell you there's no equal.

LAPUA® RIMFIRE

.22 LR cartridges for the best, by the best

RIMFIRE PERFECTION

Whatever your competitive shooting discipline, you'll find the perfect offering from our selection of .22 LR rimfire cartridges.

Serious rimfire competitors use the best firearm and ammunition available to them. Lapua continues to deliver exceptional performance – from ISSF disciplines to rimfire benchrest shooting, biathlon, pistol, and 60-shot prone .22 LR competitions. Continue to feed your competition firearm platforms the ammunition that has no equal. Find your passion with Lapua .22 LR rimfire ammunition.

THE STATISTICS PROVE IT

Throughout the years, Lapua rimfire ammunition has been the steady forerunner and the number one choice of the best shooters at countless Olympics, World Championships and other major shooting events.

In the past four Winter Olympics, 86,25 % of all individual biathlon medals were won with Lapua!!

MORE THAN 86%

X-ACT Extreme passion for precision

Lapua's X-ACT .22 LR ammo has been developed after an extensive research program to unite all of the best properties of each of the components. The shooters can depend on the absolute accuracy and consistency of this cartridge, known as an extremely sophisticated product of highest quality. X-ACT has been tested by most of the world's top rimfire shooters, and the comments have been nothing but praise: "The best .22 LR ammunition I ever shot." Our X-ACT ammunition is the true embodiment of our Passion for Precision.

MIDAS+ The new generation Midas cartridge

Lapua's Midas+ rimfire ammunition is the improved generation of Midas. The long success story of Midas ammo brought a lot of excellent results, which have been used as the basis for the new generation cartridges. Always accurate, this is the .22 LR ammunition of choice for many world class rimfire shooters.

CENTER-X Versatility and superb perfomance

Lapua's Center-X gives you the confidence of high quality .22 long rifle match ammunition. This ammo is widely used by rimfire enthusiasts around the world. Lapua's Center-X is a versatile .22 LR cartridge known for its superb performance.

PISTOL KING

Loaded for success

This .22 LR ammunition was developed to be an extremely accurate competition cartridge ideal for short barreled firearms. It is consistent, provides excellent accuracy and gives smooth, reliable and dependable functioning. Lapua Pistol King has been loaded for success.

PISTOL OSP Worldwide pistol ammo favorite

Lapua's Pistol OSP is a specialized ammunition for OSP (Olympic Sport Pistol) disciplines. Constant, accurate and precise, it is a favorite among rapid fire pistol shooters worldwide.

POLAR BIATHLON

Ideal target performance in all conditions

Lapua Polar Biathlon has been the ammunition behind the vast majority of biathlon medals won worldwide for many years. This cartridge is specifically designed for use in the frigid conditions common to most biathlon competitions. Lapua's Polar Biathlon round offers ideal performance under all conditions, with consistent accuracy and reliable ignition.

Lapua Polar Biathlon is used by nearly all of the National Biathlon Teams for cold weather competition.

Lapua works closely with the International Biathlon Union and actively promotes biathlon sports.

LAPUA® RIMFIRE

Test centers

The Lapua rimfire test centers are a partner for shooters from all around the world. Our customers include numerous international top shooters and world champions.

Our mission is to provide serious competitors an opportunity to select the very best rimfire ammunition, matched specifically to their firearms. To that end, we offer the ability to test a variety of different types and lots of Lapua rimfire ammunition at our facilities in Germany, USA, Finland and Norway.

Testing is performed from a machined rest in a controlled environment, eliminating the variables associated with outdoor testing, shooter fatigue, and operator error.

The barreled action of the rifle is first removed from the stock then mounted into a precision machined bedding block. This block is then put into our return to battery fixture, which is attached to a large concrete block that has its own foundation separate from the rest of the building. We take these steps to ensure that as many variables as possible are removed during the testing process. This helps us to provide you with the most reliable testing data vou can find.

LAPUA® CENTERFIRE

Superbly accurate target shooting cartridges

THE FINEST AMMUNITION IN NUMEROUS CALIBERS

All Lapua cartridges feature superior accuracy characteristics. Reliable and timely ignition, optimal muzzle velocity and excellent ballistic properties are the result of well designed and carefully manufactured components. The Lapua cartridge is the perfect combination of state-of-the-art brass, exceptional bullets together with topnotch primers and gun powder. Assemble these with our well known passion for precision, and you have simply the finest ammunition in the world. Our versatile range of target cartridges offers solutions for all kinds of sport shooting disciplines such as long range, rifle silhouette, practical shooting and many more.

Despite the automation in production and quality assurance, our staff personally inspects every ammunition lot and, if necessary, even each individual cartridge. The finishing touch of the carefully controlled manufacturing process is the primer and powder, perfectly compatible with the case and the bullet. We work together with the leading powder and primer manufacturers to carefully choose the powder and a dependable primer that best fits each cartridge type. Reliability and accuracy of the ammunition we produce is continuously proven in test shootings.

.222 REMINGTON

The .222 Remington, also called "The triple deuce", was a popular target cartridge particularly among benchrest shooters from its introduction in 1950 until the mid-1970s. Lapua offers a perfect selection of factory loaded cartridges in this centerfire caliber.

.223 REMINGTON

It is one of the most popular centerfire rifle cartridges in the world. It is today one of the most common rifle rounds in use in the U.S., especially among varmint hunters and 3-gun sport shooters. This caliber offers tremendous versatility, thanks to a very wide selection of bullet types and weights. For targets beyond 600 m and practical matches, Lapua offers the perfect bullet in this caliber.

.243 WINCHESTER

Lapua's .243 Winchester ammunition gives you a mild recoiling cartridge with top notch accuracy and a flat trajectory suited to long range hunting and target shooting. Like many other cartridges of today, the .243 Win began as a wildcat, necked down from the .308 Win. It gained popularity in North America among deer and varmint hunters, and in Scandinavia it has always been a preferred caliber of bird and medium size game hunters. The two major reasons for the popularity of the .243 Win. are the flat trajectory and very mild recoil.

6MM BR NORMA

The 6mm BR Norma is the cartridge of choice in ISSF and CISM 300 m events. Lapua's 6mm BR ammunition is the right choice for shooters who want a lighter bullet that is easier on the shoulder, and yet delivers reliable match winning accuracy. Lapua's 6mm BR ammunition is currently used by world's top competitors.

6.5 CREEDMOOR

Whether its multi-gun, PRS, NRL or other competitive disciplines, the 6.5 Creedmoor has dominated the winner's circle and contributed to each discipline's sustained growth. The 6.5 Creedmoor's popularity with competitive shooting has gained recognition throughout the hunting community as well, and has quickly established itself as an excellent medium sized game offering. Shooters enjoy a variety of factory loaded offerings, such as Lapua's 8,0 g / 123 gr Scenar and 9,1 g / 140 gr Naturalis, that provide exceptional performance across a broad range of applications.

.260 REMINGTON

There is a growing demand for a match solution for .260 Remington. Lapua has risen to the occasion and presents a new factory-loaded .260 Rem cartridge designed to conquer the market and outperfom the competition at shooting ranges up to 1,000 m/yds and even beyond. The .260 Rem. factory-loaded cartridge is loaded with Lapua's 8,8 gram / 136 grain Scenar-L bullet.

Even if the .260 Rem. cartridge has a slightly shorter max overall length compared to the 6.5 Creedmoor round, it still performs similar to the latter in terms of muzzle velocity and hit accuracy. The .260 Rem. cartridge has a Large Rifle Primer (LRP) pocket.

6.5X47 LAPUA

Fast, incredibly accurate and having light recoil, the 6.5x47 Lapua is a cartridge designed for serious competition shooting, specifically for 300 meter matches. The chamber and throat dimensions are optimized for the Lapua Scenar bullets. After its introduction in 2005, shooters of other disciplines quickly saw the advantages of the 6.5x47 Lapua and began using it in several other venues as well.

6.5X55 SE

Especially popular in the Scandinavian countries, including long-range field shooting discipline, Lapua's 6.5x55 SE cartridge delivers a flatter trajectory and excellent ballistics. Though traditionally most used at longer ranges, our 6.5x55 SE cartridge is today extremely popular in competitions from 100 to 800 meters.

.308 WINCHESTER

Popular and precise. Perhaps the most versatile target shooting cartridge, the .308 Winchester is one of the most popular centerfire calibers today. Lapua's .308 Winchester is an excellent choice when you want a cartridge that is sure to perform across a range of disciplines in competition and hunting.

8X57 IS

The 8x57 IS has earned a strong hunting image in recent years, but is now taking a step in the target shooting direction. A notable advantage of the new 120 gr OT bullet and the factory-loaded cartridge is that the bullet's point of impact coincides with the Lapua Naturalis, making both products ideal for hunting practice.

.300 WIN MAG

For the demanding target shooter and tactical forces, Lapua offers the perfect .300 Win Mag. Cartridge option: the .300 Win Mag. Loaded with the 12,0 g / 185 gr OTM Scenar bullet.

This cartridge offers accuracy and power well beyond 1,000 meters/yards with the Scenar projectile staying supersonic. The unique design of the 185 grain Scenar (GB432) together with the short case neck and relatively short CIP cartridge specs create an undeniably powerful combination for long range target shooting. With a high quality powder and a muzzle velocity of 930 m/s or 3051 fps, this cartridge is destined to become the number one choice for any long range enthusiasts demanding peak accuracy.

9.3X62

The 9.3x62 has traditionally been used only with big game hunting in mind. Requirements have changed with time and today this rifle cartridge needs a bullet that offers a more diverse use of the caliber amongst hunters. Lapua has answered this demand and developed the world's most accurate Open Tip bullet for this caliber, which extends its use to a diverse set of options from practice shooting to small predator hunting. Also here, the impact point of resembles that of the Naturalis bullet, making this the ultimate round for hunters training for big game hunts.

.338 LAPUA MAGNUM

The world's most accurate at extra-long distances. We are proud to say that the .338 Lapua Magnum is simply the world 's best long-range precision cartridge – the original one from Lapua. It outperforms all .30 caliber cartridges at longer ranges, delivering exceptional performance up to 1500 m. The .338 Lapua Magnum comes factory loaded with a choice of world leading precision bullets. The .338 OTM Scenar is ideal for the long-range sports shooter.

LAPUA® CENTERFIRE

Hunting cartridges

Whether you're hunting smaller game such as deer, boars or bear with tough hide, or large elk and moose, Lapua offers a wide range of cartridge options loaded with Lapua hunting bullets for your pursuit.

Lapua hunting ammunition is precision loaded and optimized for terminal ballistics and for every conceivable environment. From humid woods to dry hot deserts, or snow covered mountains, you can count on Lapua!

LEAD-FREE EXCELLENCE WITH LAPUA NATURALIS COPPER BULLETS

The Naturalis bullet is designed and manufactured by using pure copper. The material, design and controlled expansion ensures a solid and nearly unbreakable construction. The weight retention, even after impacting on heavy bone, is frequently 100% of the bullet's original weight. The boat tail design of the bullet eases reloading, and together with the streamlined ogive it provides improved downrange ballistics.

The Naturalis bullet, by design, begins to mushroom immediately upon impact. The expansion process begins with the bullet tip cavity which expands symmetrically and without fragmentation. This provides maximum energy transfer to the animal, minimizes the meat loss, and provides a guick and ethical kill.

482 m/s -> 11.0 g 1581 fps -> 170 gr

791 m/s -> 11.0 g 2595 fps -> 170 gr

MEGA FOR BIG GAME

The Lapua Mega is a soft point bullet designed for big game hunting. It features a traditional lead-core and copper jacket that are bonded for maximum weight retention after impact and expansion. The Mega has a long jacket that protects the core and prevents premature expansion, or breakage, when the bullet travels through brush or grass cover.

The Mega's mechanical bonding locks the core firmly within the jacket and will not separate even on the hardest impact. It typically doubles its caliber width upon impact, causing an immediate shock effect, yet retains up to 97% of its original weight.

908 m/s -> 10.9 g 2979 fps -> 168 gr

.222 REMINGTON

The .222 Rem. round continuously enjoys a reputation for inherent accuracy, and it is today a popular small game and varmint cartridge at short and medium ranges. In Scandinavia the .222 Rem. became popular among capercaillie and black grouse hunters. It is accurate and reliable in all conditions. For hunting, we offer the .222 Rem. with FMJ, Soft Point and Naturalis bullets.

.223 REMINGTON

Practically all rifle manufacturers chamber rifles for this caliber for a wide range of different purposes. The .223 Remington offers tremendous versatility, thanks to a very wide selection of bullet types and weights. For varmint and small game, Lapua offers the .223 Rem. factory-loaded with the lead-free Naturalis and the FMJ.

6.5 CREEDMOOR

The 6.5 Creedmoor loaded with the 140 gr / 9,1 g Lapua Naturalis bullet provides hunters a lead-free alternative for today's ever-changing hunting landscape. Designed and manufactured from pure copper, the Naturalis is nearly unbreakable in construction and often retains 100% of its original weight. It uses state-of-the-art technology to produce consistent, controlled expansion at the widest velocity range on the market.

6.5X47 LAPUA

Fast, incredibly accurate and having light recoil, the 6.5×47 Lapua is an ideal cartridge for hunting fields as well as competitive venues. Factory-loaded with the lead-free Naturalis copper bullet it is a good choice for midsize game like deer.

.243 WINCHESTER

Lapua's .243 Winchester ammunition gives you a mild recoiling cartridge with top notch accuracy and a flat trajectory. In Scandinavia this hard-hitting cartridge has always been a preferred caliber of bird and medium size game hunters. The Lapua ammunition selection for this caliber includes two different bullet styles: the FMJs and the Naturalis lead-free hunting bullets.

6.5X55 SWEDISH

With Lapua 6.5x55 SE, whether it is used in hunting or competition, you will give no quarter to the game or your fellow competitors. A great universal choice for all types of Scandinavian hunting possibilities, with straight trajectory, excellent ballistics and a huge bullet selection – for anything from grouse to moose.

7X64

The 7×64 is a hunting cartridge, which has succeeded in maintaining its position as one of the most popular hunting calibers in Europe. The famous German cartridge designer Wilhelm Brenneke created and introduced this caliber in 1917. Since then, the 7×64 cartridge has earned a well-deserved reputation for itself as a medium size game hunting round – its performance even exceeds the performance requirements of moose hunting rounds in most countries. The Lapua factory-loaded version comes with the lead-free Naturalis bullet.

7X65R

7x65 R is one of the most popular calibers for double rifles and combination guns. The 7x65R ammunition is ballistically very close to the 7x64 and is ideal for all types of Central-European hunting. The maximum pressure level is limited by C.I.P. to 380 MPa, and the caliber meets the requirements for all European big game including moose, bear, red deer and wild boar.

.308 WINCHESTER

Hunters around the world know the .308 Win. as a compact and powerful round, notable for its inherent accuracy. The powder capacity of this round is less than the .30-06, 8×57 IS or 9.3×62 , but with modern powders it delivers energy levels similar to the .30-06 round. Hunters can rely on Lapua's .308 Win. cartridge for serious hunting situations, especially when loaded with the solid copper, lead-free Lapua Naturalis[®] bullet.

.30-06 SPRINGFIELD

The .30-06 Springfield still displays the flexibility, reliability and performance that has made it one of the world's top hunting cartridges. The Lapua hunting ammunition selection for the .30-06 is very versatile. No matter whether the game is hunted in the mountains or on wide-open plains, the .30-06 Springfield meets the demands of big game hunting. Especially with heavy bullets, the .30-06 displays great versatility on large game, and is still a very popular hunting cartridge.

.300 WIN MAG

As the .300 Win Mag. is known for its accuracy, hunters all around the world have found the cartridge to be an effective all-around choice for various types of game and hunting conditions. Most firearms manufacturers chamber for this caliber and there are numerous rifle options to choose from. Lapua offers hunters the .300 Win. Mag. factory-loaded with the 11,0 gram / 170 grain lead-free Naturalis bullet and the 12,0 gram / 185 grain SP MEGA bullet. With muzzle velocities that enable extremely straight flight trajectories, these rounds are an obvious choice for long range hunting or for situations that demand significant stopping power.

8X57 IRS

The 8×57 IRS cartridge was born at the same time as its rimless brother 8×57 IS. The original idea was to develop a similar cartridge for the breech break combination guns like double rifles, drillings and vierlings. The difference to the 8 x 57 IS round is the lower maximum pressure level which has been set for this caliber to 330 MPa. Throughout the years, Lapua's 8×57 IRS ammunition has earned its success and reputation as a powerful wild boar stopper in driven hunts.

.338 LAPUA MAGNUM

The .338 Lapua Magnum cartridge, or .338 Lapua Mag or .338 LM for short, is the ultimate centerfire rifle cartridge, purpose-built specifically for extremely long ranges. While the .338 LM round has a strong military reputation, it has been used increasingly by both long range hunters and sport shooters in disciplines such as ELR.

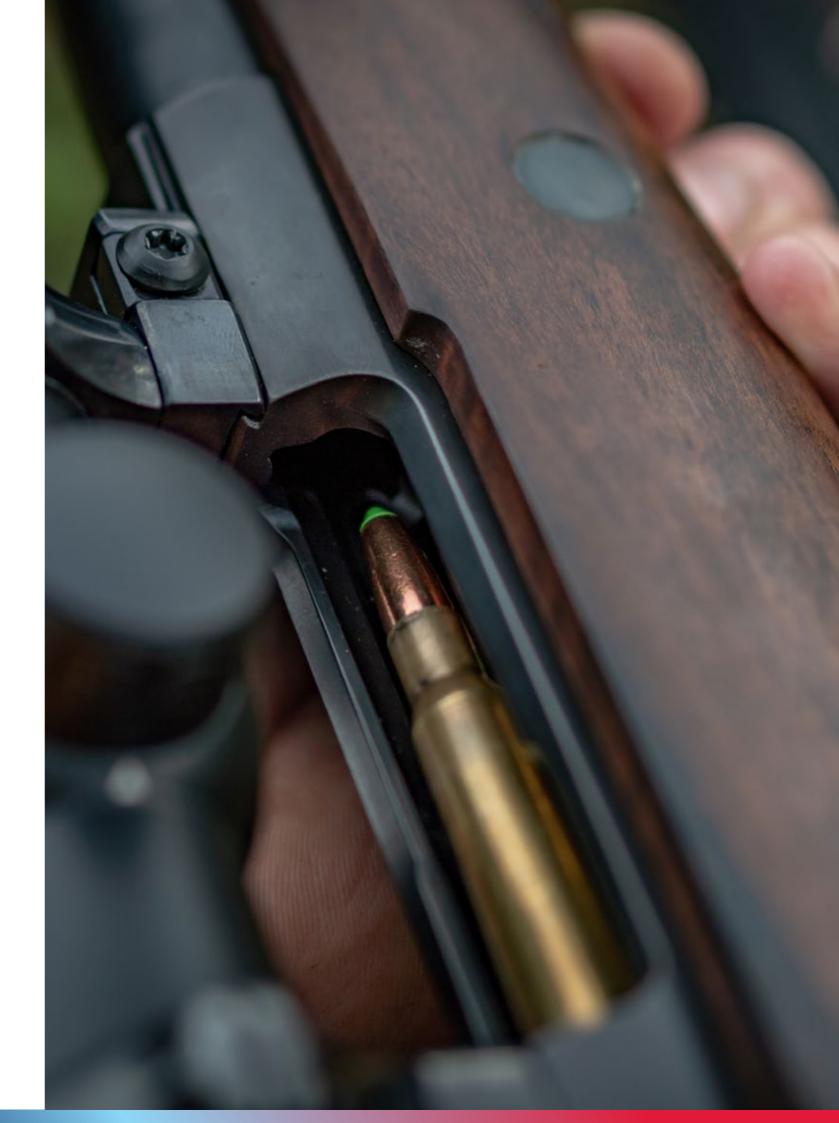

8X57 IS

The 8×57 IS is perhaps the first incarnation of today's modern sporting and hunting ammunition. Today, the 8×57 IS retains tremendously popular among Central-European hunters and European hunting rifle manufacturers for the civilian market. The powerful 8×57 IS round offers controllable power and accuracy for the Scandinavian type of big game hunting. The 8×57 IS cartridge comes factory loaded with the solid copper 11.7 g / 180 gr Naturalis bullet and also now with the new 120 gr OT bullet. With the bullet's point of impact coinciding with the Lapua Naturalis, it's ideal for hunting practice.

9.3X62

The real big game cartridge for tough situations. The 9.3x62 rifle cartridge is an ideal choice for hunting large and dangerous game in tough conditions. The 9.3x62 round is one of the best solutions for moose and bear hunting but also for driven hunts of wild boars and other similar size game. Loaded with a premium quality bullet, it is suitable for all big game in Europe, North America and even in Africa. We now also offer this cartridge with the accurate Open Tip bullet for extending its use to a diverse set of options from practice shooting to small predator hunting. The impact point of resembles that of the Naturalis bullet, making this the ultimate round for hunters training for big game hunts.

For complete details on our assortment of factory-loaded hunting ammunition and bullets, see our product list at the end of the catalogue.

LAPUA® CASES

The most precise cases on the market

Lapua cases are the best in the world, a statement supported by all top marksmen. We focus on every single detail to create the best cartridge case in the world. From the strict tolerances of primer pockets and flash holes to the necking process, Lapua brass is manufactured to be reloaded again and again. For reloaders who require absolute reliability from their ammunition, Lapua's world famous brass is the answer.

One thing is certain; we never leave our brass behind.

.32 S&W LONG WC

The Lapua .32 S&W Long case is the solid base for any reloader who wants to have best available quality in pistol cartridge reloading. Lapua pistol brass dominates the competitions in centerfire pistol shooting offering optimal on-target performance.

.220 RUSSIAN

The Lapua .220 Russian case is the most popular brass for benchrest shooting. The .220 Russian is the parent case for the .22 PPC, 6mm PPC and the 6.5mm Grendel cartridge. More than 90 % of all the benchrest shooters in the world use Lapua's .220 Russian cases as a parent case for 6mm PPC. There is no doubt - Lapua's .220 Russian brass is the king of benchrest reloading.

.222 REMINGTON

Our .222 Remington is a pure Lapua quality product produced with extremely tight tolerances in neck concentricity and wall thickness. This flat shooting little round is excellent for small game hunting and varmint purposes. The Lapua .222 Rem. brass can be reloaded time after time, without losing its performance and precision.

.223 REMINGTON

Lapua's .223 Remington Match case shows unbelievable performance when it comes to both durability and precision. Consistent quality guarantees consistent results. The large case volume ensures high velocity potential. Lapua offers a true match quality brass case for this classic military cartridge, allowing it to live up to its potential as a competitive cartridge.

.22-250 REMINGTON

Potent and versatile. Lapua sets the industry standard in Match quality cases, and our .22-250 brass follows in this proud tradition. From varminting to long range target shooting, the .22-250 still remains one of the most potent and versatile of the .22 caliber cartridges.

6MM BR NORMA

Without exaggeration, Lapua's 6mm BR case is absolutely the best case in its class. The 6mm Norma BR has become a popular chambering in match rifles used in 300 meter rifle disciplines. Lapua's 6mm BR Norma is the standard to which all other cases are compared.

6MM CREEDMOOR

Our 6mm Creedmoor is a beautifully drawn case, properly annealed at the neck and shoulder, with head metallurgy specifically chosen for durability, and the same small rifle primer, small flash-hole design that delivers the ultimate accuracy edge. The smaller 6mm bore diameter offers an excellent selection of proven low-drag match bullets that offer outstanding long range performance with even less recoil.

.243 WINCHESTER

The .243 Winchester case has all the world famous qualities of Lapua's unrivaled .308 Winchester brass. With a light bullet load the .243 Win. case works like a charm for long distance varmint and bird hunting. For larger game, such as deer, the optimal choice of bullet weights is 100 - 105 gr.

6.5 CREEDMOOR

Made with Lapua's typical dedication to precision, our 6.5 Creedmoor case has been refined just a bit, to make it an even better performer. We offer the 6.5 Creedmoor with the small rifle primer which normally produces an optimized ignition and better accuracy in mid-sized cartridges, as well as the large rifle primer version.

6.5 CREEDMOOR LARGE RIFLE PRIMER

The 6.5 Creedmoor LRP offering provides reliable ignition with a large primer in the most extreme weather conditions for hunting, competitive shooting or military / law enforcement support. It also functions and performs flawlessly in today's ever-popular semi-auto gas guns, AR's, and other similar platforms predominantly used in the US market place.

6.5 PRC

Although the 6.5 Precision Rifle Cartridge (or PRC for short) was originally designed for long range hunting, the 6.5 PRC is still an excellent cartridge for both long range sport shooting and hunting. Its increased case capacity enables velocities up to 80 m/s (262 fps) faster than the 6.5 Creedmoor or 6,5×55 SE. By design, the cartridge features a longer throat enabling the use of today's popular, high ballistic coefficient (BC) projectiles for long-range competitions. The 6.5 PRC case is a good match with relatively slow burning powder types. It is a great choice for heavy bullets, exceeding even 9,7 g / 150 grains with excellent retained energy and terminal performance for mid-sized and large game.

6.5 GRENDEL

Tack-driving accuracy. The 6.5 Grendel case is tailored to fit the AR-15 action and it dramatically outperforms the .223 Rem. and other cartridges normally used in the AR-15. The 6.5 Grendel is continuously growing in popularity in all disciplines which demand light recoil and tack-driving accuracy.

6.5X47 LAPUA

A true masterpiece. The 6.5x47 Lapua case has base diameter and loading length similar to the .308 Win., allowing it to accept the same bolt heads and fit into similar actions and magazines. Lapua's 6.5x47 case is also the parent case of several popular wildcats, and is frequently necked down to 6mm.

6.5X55 SWEDISH

"Old soldiers will never die". Lapua's 6.5x55 SE is a proof of that – it has long been popular all over Scandinavia, and now its characteristics and performance have been noted by shooters and hunters in other parts of the world as well.

.260 REMINGTON

Offering the same level of ballistic performance as the venerable 6.5x55, the modern case design of the .260 Remington delivers superb accuracy in a short action format. Having already established its tremendous versatility not only in the game fields, but on silhouette ranges, the .260 is a natural for the Lapua line.

6.5-284

The favorite brass of long range shooters and an ideal selection for any game where a potent .264" cartridge is considered suitable. This world renowned Lapua brass is of match quality that can be loaded more times than any brass from competitors. Lapua 6.5-284 is the reloader's dream.

7MM-08 REMINGTON

The 7mm-08 came to dominate the High Power Silhouette rifle game shortly after its introduction, offering a superb combination of power, light recoil and accuracy. With ballistic performance exceeding that of the time honored 7x57mm Mauser, but suited to a shorter action, the 7mm-08 is an ideal caliber for most big game hunting.

7X64

The 7x64 has succeeded in maintaining its position as one of the most popular hunting caliber in Europe. Since then, it has earned a well deserved reputation for itself as a medium size game hunting round – its performance even exceeds the performance requirements of moose hunting round in most countries.

.308 WINCHESTER

One of Lapua's flagship cases. Our .308 Winchester case has made Lapua quality world renowned. It continues to be the standard by which all other cases in this popular rifle caliber are judged. The main advantage of our .308 Win. brass is the premium consistency and quality.

.308 WINCHESTER PALMA

Long-range accuracy by Lapua. Developed in conjunction with the US Palma team, the small rifle primer case is designed to deliver enhanced long-range accuracy for the most demanding competitive applications. Lapua's .308 Palma Win. brass has been acclaimed as a success by rifle shooters everywhere.

.30-06 SPRINGFIELD

Durability for reloading. The venerable .30-06 case offers an even greater powder capacity than the .308, but the Lapua quality remains the same. Like its smaller stable mate, the .30-06 has the same durable construction and incredible precision, allowing for many, many reloadings.

.300 NORMA MAGNUM

A recent development based on the .338 Norma Magnum necked down to .30 caliber, the .300 Norma Magnum was adopted as the US military's Advanced Sniper Cartridge "for extra long ranges beyond 1500 meters". In addition to its military duties, the .300 Norma is sure to find favor with long-range competitive shooters and hunters.

.284 WINCHESTER

The .284 Winchester cartridge has experienced a recent resurgence in F-Class competition, where shooters compete to distances out to 1,000 m/ yd. Members of the US Rifle Team, which Lapua sponsors, will enjoy having cases readily available in this classic cartridge. The .284 Winchester's rebated rim design enables a larger powder column, yet easily functions through medium length actions making it desirable for custom rifles. Its accuracy potential and high muzzle velocity is also recognized in hunting fields where this cartridge performs nicely on a very wide scale.

.300 WIN MAG.

The .300 Winchester Magnum has been a staple within the firearms industry, widely used by hunters, target shooters, military and law enforcement agencies around the globe since its development in the early 60's. It is still used for competitive target shooting, hunting, and Mil/LE platforms to-date. It delivers excellent long range performance with a wide range of bullet weights from 165 to 200 grains and more. The .300 Winchester Magnum has a great reputation as a .30 caliber magnum hunting cartridge in Europe and North America. Lapua's .300 Win. Mag case will be a great addition to our line, especially with the huge bullet selection available for sport shooting and hunting for this caliber and all major rifle manufacturers chamber their rifles for it.

.300 PRC

The .300 PRC was designed for extreme long range shooting with heavy bullets featuring high ballistic coefficients. Its superior ballistics and beltless case configuration represent modern case design that supports the use of modern long and high BC bullets. With its ability to load heavier bullets, the performance of the .300 PRC exceeds the .300 Winchester Magnum and many other .30 Magnums on the market. The .300 PRC is also an superb choice in open and large hunting fields for long distance hunting of mid-to-large sized game with bullet weights exceeding 15,8 g / 245 grains.

7X65R

One of the most popular calibers in Central European hunting for double rifles and combination guns is now available as a reloading component for all enthusiastic hunters and home loaders. Optimized for tens of reloading cycles with reliable removal from the chamber.

7.62X53R

The Finnish legend. This case is a legendary Finnish innovation, still used in military, Scandinavian hunting and traditional rifle competitions. Lapua has manufactured 7.62x53R cases for almost a century, and this caliber is well known for its ultimate quality and consistent performance.

7.62X39

Best in its class. Lapua's 7.62x39 brass offers match quality that no other manufacturer has for this caliber. When it comes to competition, Lapua's 7.62x39 case is the unquestioned champion over all others.

8X57 IS

From African plains game to European stag and boar, the 8mm Mauser has earned an enviable reputation as a big game round in a wide array of conditions. Accurate, versatile and powerful, the 8x57 IS still serves the sporting community well for a host of hunting applications.

8X57 IRS

Lapua standard for breech brake combination guns like double rifles, drillings and vierlings. No matter what kind of game you are aiming, the quality of the case will not be the one to blame if you miss. Tens of reloading cycles will tell you the secret of Lapua's incredible case quality.

.338 LAPUA MAGNUM

The unbeaten champion. Lapua's signature development, the original .338 Lapua Magnum is the undisputable choice for those who want to build their own long range rifle cartridge, using only the very best available components. The accuracy, reloadability and repeatability of .338 Lapua Mag. brass are unbeaten. The .338 LM case is a favorite among top rifle shooters around the world and in all kinds of shooting disciplines and hunting grounds.

.338 NORMA MAGNUM

Based on the .416 Rigby case, the .338 Norma Magnum was developed by J. Sloan and D. Kiff as a long-range sporting cartridge. Norma adopted the design and standardized it with CIP in 2010. The US military has spurred the development of some machineguns chambered for the .338 Norma, which would be capable of providing superb long-range capability. With Lapua's unmatched standard of quality, handloaders will find our new .338 Norma Magnum cases a choice for extra long range shooting applications.

9.3X62

The hunter's brass choice. The 9,3x62 case is the top choice for hunters of big game who tailor their own rifle loads. True stopping power for big and dangerous game. A life-long partner for hunters worldwide.

LAPUA® BULLETS

Precision projectiles to fit your passion

Lapua bullets are known for their extreme accuracy and superior ballistic designs. From the world famous Scenar and Scenar-L, to the variations of FMJ, all of which are optimized for their intended use, and finishing with the NATURALIS and MEGA for hunters. From Olympic Gold to World Championships or local matches, to the mountains and woods, whatever your shooting pursuit, there is a LAPUA bullet perfectly tailored for it.

Lapua bullet development is ongoing and methodical. Drawing on our own experience, R&D, and listening carefully to reloaders and their feedback, we continually work to perfect our product offerings for every type of shooting discipline.

SCENAR

The first choice for serious target competition. Lapua Scenar Open-Tip Match bullets have given superb results at long ranges and bench rest shooting. The Scenar bullets have the IBS World Record in 600 yard Heavy Gun 5-shot group (0.404") and also hold the official world ISSF record of 600 out of 600 possible, an unbeatable score.

SCENAR^L

The ultimate long range match bullet. The Scenar-L has the refined qualities of the original Scenar bullet with higher standards of jacket wall concentricity, weight variation and dimensional uniformity. Scenar-L has truly earned its reputation as the go-to bullet for the best possible results in long range rifle shooting. For top shooters in the world in bench rest, long range or F-class, Scenar-L is the ultimate match bullet, proven by the countless long range records set using it.

NATURALIS

Respecting the game. The bullet is designed and manufactured by using pure copper. The material, design and controlled expansion ensure a solid and nearly unbreakable construction. The weight retention of the bullet, even after impacting on heavy bone, is frequently 100% of its original weight.

MEGA

For big game hunters. Lapua's Mega bullet is a soft point jacketed hunting bullet. The Mega is a traditional lead core bullet for all kinds of European and North American game, particularly large game hunting. The mechanical bonding locks the lead alloy in place, keeping the structure together at point of impact.

Scenar is available in following calibers / weights:

6.5 mm (.264)	6,5 grams / 100 grains
6.5 mm (.264)	7 grams / 108 grains
6.5 mm (.264)	8 grams / 123 grains
6.5 mm (.264)	9 grams / 139 grains
7.62 mm (.308)	10 grams / 155 grains
7.62 mm (.308)	10,85 grams / 167 grains
7.62 mm (.308)	12 grams / 185 grains
8.61 mm (.338)	16,2 grams / 250 grains
8.61 mm (.338)	19,44 grams / 300 grains

Scenar-L is available in following calibers / weights:

5.69 mm (.224) 5.69 mm (.224) 6 mm (.243) 6 mm (.243)	4,5 grams / 69 grains 5 grams / 77 grains 5,8 grams / 90 grains 6,8 grams / 105 grains
6.5 mm (.264)	7,8 grams / 120 grains
6.5 mm (.264)	8,8 grams / 136 grains
7 mm (.284)	9,7 grams / 150 grains
8 mm (.284)	11,7 grams / 180 grains
7.62 mm (.308)	10 grams / 155 grains
7.62 mm (.308)	11,3 grams / 175 grains
7.62 mm (.308)	14,3 grams / 220 grains

Naturalis is available in following calibers / weights:

5.69 mm (.224)	3.2 grams / 50 grains
6 mm (.243)	5.8 grams / 90 grains
6.5 mm (.264)	9.1 grams / 140 grains
7 mm (.284)	10.1 grams / 156 grains
7.62 mm (.308)	11.0 grams / 170 grains
8 mm (.323)	11.7 grams / 180 grains
8.61 mm (.338)	15.0 grams / 231 grains
9.3 mm (.366)	16.2 grams / 250 grains

Mega is available in following calibers / weights:

6.5 mm (.264)	10,1 grams / 155 grains
7.62 mm (.308)	9,72 grams / 150 grains
7.62 mm (.308)	12 grams / 185 grains
7.62 mm (.308)	13 grams / 200 grains
9.3 mm (.366)	18,5 grams / 285 grains

SOFT POINT

Lapua's Soft Point bullet is designed for small game hunting where the rapid opening and mushrooming of the bullet are some of the most important characteristics. The Lapua Soft Point bullet is well known for its accuracy. This hunting bullet has proven its performance on the hunting fields and hunters can rely on its stopping power.

Soft Point is available in following calibers / weights:

5.69 mm (.224) 3,6 grams / 55 grains

CUTTING EDGE

An open tip bullet capable of incredible accuracy, the Cutting Edge leaves an easy to score hole in your target, thanks to its innovative design. When you are looking for the best short range target bullet for paper-punching, your choice is the .30 caliber G477 6.5g/100gr OT Cutting Edge. This bullet typically achieves groups of under 25 mm at 100 m shooting distances.

D46

Often copied, never equaled. The legendary D46 is one by which all others of its type are measured. Manufactured to the strictest tolerances for concentricity, uniformity of shape and weight, it has shot its way to the record books since the 1930's all the way to the 21st century. The D46 is available in caliber 7.62 mm (.308) as a 12 gram / 185 grain bullet.

D166

The D166 boat tail bullet sports the same design as the legendary D46 bullet, but with a larger diameter. Lapua's D166 bullet has been used in Finnish military applications since 1936 and it still has a great reputation among traditional mid-range and long range rifle target shooters.

FMJ

Whether you require bullets for training, competitions or serious hunting situations you can really trust the performance of Lapua's FMJ bullet family. Ten rounds loaded with Lapua's .30 S374 8.0g/123gr FMJ bullet from 100m can easily achieve groupings less than 30mm. Reliability means that every shot you fire will hit the target.

OPEN TIP

The Lapua Open Tip bullets are the first choice for superior accuracy in various rifle competitions. The Open Tip Match (OTM) bullets have shown superb results in mid-range rifle shooting and bench rest shooting. An easy and softly firing bullet that meets Lapua's strict accuracy requirements.

LOCK BASE

Lapua's Lock Base bullet is a Lapua innovation which combines a full metal jacket and boat tail with a patented base design. This bullet has proven its worth in sport shooting arenas as well as military and law enforcement applications over time.

Lock Base is available in following calibers / weights:

7.62 mm (.308) 11 grams / 170 grains 8.61 mm (.338) 16,2 grams / 250 grains

FIND YOUR PASSION

LAPUA® CENTERFIRE

Tactical ammunition

Lapua is world renowned for offering the highest quality ammunition for elite forces and military / law enforcement professionals around the globe. All of Lapua's Tactical ammunition is produced to the same match-grade requirement as our target ammunition.

The most accurate long-range cartridges

The accuracy and reliability of Lapua's tactical ammunition is renowned worldwide. Each cartridge is manufactured with the same unconditional precision and care as our leading sport shooting target ammunition. Our pinnacle of precision and quality is the .338 Lapua Magnum, which has an effective range out to 1500 meters. Despite this, the .338 Lapua Magnum operating systems are about the same size and weight as the 7.62mm systems. It's considerably lighter than the .50 caliber system making it an exceptional alternative to either platform.

Specialized in precise operations

Lapua started manufacturing ammunition in 1923, and since then match ammunition development and production have been an essential part of Lapua operations. During this past century, we have introduced numerous iconic offerings within the sniper ammunition and tactical shooting segments.

Lapua tactical ammunition is made to meet the same standards and requirements like our match ammunition that have been used to win innumerable medals and championships in national and international shooting competitions. The Lapua Tactical Ammunition is much more than just match ammunition as Lapua Tactical Ammunition are made to meet strict military transportation and storage requirements. Lapua's most famous individual product is the .338 Lapua

Magnum that outperforms other long range cartridges in military applications. Our product range covers the Lock Base FMJBT, Scenar OTM, AP, API and other cartridge types for military tactical shooting applications. Lapua .338 Lapua Magnum ammunition provides superior long-range performance second to none. For example, Lapua's .338 LM 300 gr AP bullet will penetrate at least 12 mm (c. 0.5 inch) of super hard HB500 armor steel at 600 meters.

The .338 Lapua Magnum is not the only product in Lapua tactical product family. We supply also the world's best selection of .308 Win tactical cartridges that include also the Lock Base FMJBT, Scenar OTM, AP and other cartridge types for various tactical implementations.

Our .308 Win. ammunition apex is a 170 gr Lock Base bullet that is loaded to two different cartridge types: The legendary high velocity HPS round, that is the most flat shooting and outreaching .308 Win. sniper ammunition available. Other type is the .308 Win. Semi Auto cartridge tailored for short barrel self-loading rifles.

The most recent additions in our product range are the 6.5 Creedmoor and .260 Rem. tactical cartridges. Although the .300 Norma Magnum and .338 Norma Magnum ammunition are not listed in ballistic tables in this catalog, they will be available in future.

History of the .338 Lapua Magnum

by Janne Pohjoispää

The .338 Lapua Magnum originates back to year 1982 when the .338/416 cartridge was developed for the United States military purposes. Officially, the project was to develop a target rifle and cartridge for 1000 yards, but in reality the purpose was more likely to develop a 1500 meter sniper rifle.

The 300 Winchester Magnum and other commercial cartridges did not meet penetration requirements, so the search for heavier caliber with better ballistics created a wildcat cartridge that was originally formed from a necked down 378 Weatherby Magnum case, and finally from the 416 Rigby case. The new cartridge was known as the .338/416 or 8.58x71.

Lapua finished development of the first bullets and cases for the .338/416 cartridge in 1985. Its first .338 caliber bullet was the B408, which in 1985 looked more like a steroid fed D46 than the Lock Base type currently produced.

In 1986 the .338/416 cartridge with Lapua bullet and case, won the 1,000 yard navy rifle competition in Quantico, Virginia. In spite of that, the U.S. military selection criteria went in a different direction. Lapua was left more or less alone with the new caliber cartridge, yet management decided to continue its product development. This resulted in specifying the measurements, and the cartridge was named the .338 Lapua Magnum. The .338 Lapua Magnum was slightly different than the original .338/416. Case and chamber dimensions were modified, along with the interior structure of the case to withstand higher chamber pressures than the .338/416 design. The .338 Lapua Magnum became a new Finnish cartridge, even though the idea was born on another continent.

The loading techniques were also developed and refined at Lapua. A powder load of approximately 90 grains of slow burning powder needs a powerful ignition using a large rifle magnum primer. The first test lot of .338 Lapua Magnum ammunition was produced in 1988, with CIP approval following in 1989.

The original B408 design from 1984 was modified to Lock Base type, and the B408 got its current shape. Its weight remained at 250 grains. The first soft point bullet was MIRA, streamlined from the Mega bullet. The 259 grain EB431 bullet was introduced commercially with the new cartridge in 1990.

The HPBT Scenar bullet was introduced in 1996. Different kinds of special purpose equipment were also tested: armor piercing, armor piercing incendiary, solids and SLAPtype projectiles were examples of the tested specimens.

Soon the new cartridge started raising interest on the original continent of development. The larger .338 Lapua Magnum cartridge did not fit into traditional size actions and required a larger platform. Very few of these larger bolt action rifles existed, so cooperation with some European manufacturers started in the late 1980's to develop suitable rifles for the .338 Lapua Magnum. Among the first rifle makers were Accuracy International of UK and Sako of Finland. Accuracy International later delivered the first military contracts for .338 Lapua Magnum rifles. In the 1990's more .338 Lapua Magnum rifles appeared in the market. During the following years, the .338 Lapua Magnum received a steady foothold in many Western hemisphere armies and similar organizations.

This catalog reveals the current Lapua selections of .338 Lapua Magnum ammunition, including both 250 and 300 grain Scenar and AP projectiles.

Lapua offers a complete selection of .338 Lapua Magnum ammunition including Ball, Armor Piercing, Armor Piercing Incendiary, Open-Tip, Blank, Drill and Solid cartridges.

The Original .338 Lapua Magnum

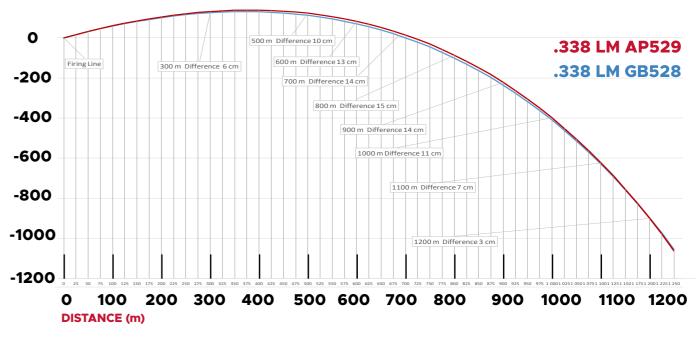

applications, extending the operator's range to well beyond one kilometer.

.338 Lapua Magnum fills the gap between 7.62mm and .50 caliber sniper systems. The .338 Lapua Magnum sniper systems are currently employed by several armed forces throughout the world. The trajectories of Lapua bullets are tailored to match, so there is no need to change sight setup when changing the cartridge type. Some cartridges are hermetic, optional for all products. All .338 Lapua Magnum cartridges are packed in M2A1 steel cases.

The world's most accurate at extra-long distances. We are proud to say that the .338 Lapua Magnum is simply the world's best long-range precision cartridge - the original one from Lapua. It outperforms all .30 caliber cartridges at longer ranges, delivering exceptional performance up to 1500 m. The .338 Lapua Magnum comes factory loaded with a choice of world leading precision bullets.

Matching trajectories

.338 LM 300 grs Scenar and AP bullet path difference while a 300 gr Scenar is zeroed at 700 meters.

The Original .338 Lapua Magnum is currently the best choice for long range sniper

B408 Ball features a 16.2 g / 250 gr Lock Base FMJBT bullet, remaining supersonic up to 1300 meters. AP485 features a 16.1 g / 248 gr Armor Piercing bullet, trajectory matched with B408 Ball. The world's most accurate armor piercing ammunition will penetrate 10 mm of armored steel at 800 meters.

.338 Lapua Magnum cartridges are also offered in 19.4 g / 300 gr, including the GB528 Scenar, AP529 Armor Piercing and API571 Armor Piercing Incendiary, extending accuracy and penetration capabilities at longer ranges.

The world standard, Lapua's .308 Winchester

.308 Winchester (7.62x51mm NATO) possesses mild recoil, good terminal ballistics, and an effective range of 800 meters (875 yards). This versatility is the reason the caliber remains the most popular choice for use in law enforcement and military sniping applications.

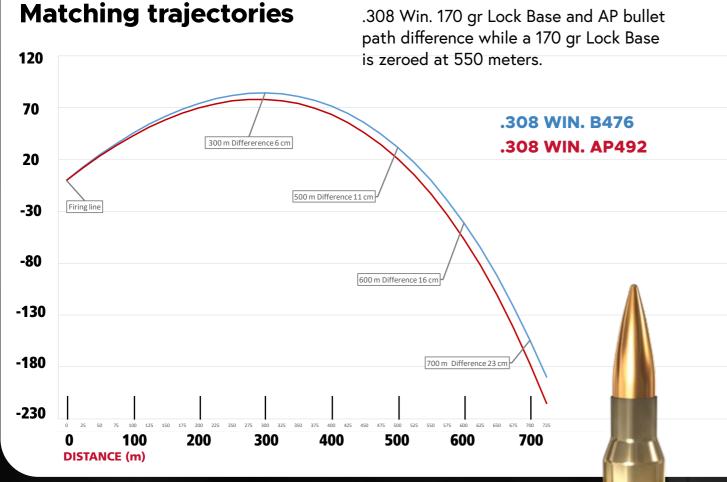

Lapua is the world leader in providing match grade projectiles in this caliber, offering several types of Ball, Open-Tip, Armor Piercing, Solid, and Subsonic bullets.

Since the introduction of the legendary D46 cartridge,

still in use today, Lapua's .308 Winchester ammunition is in use by militaries and government agencies throughout the world. Lapua .308 ammunition is not only the world's most accurate, but the closely matched ballistic trajectories between different projectile types increases its tactical effectiveness for the operator.

.308 Winchester is probably the most versatile centerfire rifle caliber today, and capable of outstanding accuracy. The caliber was introduced in 1952.

.308 Win. 170 gr Lock Base and AP bullet

For mid-range

6.5 CREEDMOOR

The 6.5 Creedmoor has received a lot of attention and continues to grow in popularity also in tactical applications. The 6.5 Creedmoor is a very flat shooting cartridge with excellent ballistics that often exceed the 308 Winchester in windy, long range conditions. In terms of ballistics and hit probability, the 6.5 Creedmoor is best compared to the .300 Winchester Magnum. The 6.5 Creedmoor size is similar to the .308 Winchester and it will fit in similar actions and platforms. The 6.5 Creedmoor is a true 1000 m round that can be used with both semi-auto and bolt action rifles.

For tactical applications, Lapua offers 6.5 Creedmoor ammunition packed to meet military requirements loaded with OTM bullets. Lapua also offers the first Armor Piercing (AP) offering AP570 available for the 6.5 Creedmoor.

.308 WIN. 11 G / 170 GR FMJBT SEMI-AUTO CARTRIDGE

This tactical cartridge by Lapua is developed for short barreled semi-auto rifles. It is designed for optimal ballistic performance in shorter barrels (12"-20"). Lapua tailored the powder type and charge weight to reduce muzzle blast and flash while still delivering outstanding accuracy and velocity. From a standard 16" barrel, muzzle velocity should be 754 m/s and routinely capable of shooting groups under 1 MOA at 300 meters (<87mm / 300m) with quality rifles. This tactical cartridge works flawlessly with DMR-type semi-auto rifles.

.260 REMINGTON

The .260 Remington is also a medium length cartridge with similar dimensions to the .308 Winchester. Developed several decades earlier as wildcat cartridge, the .260 Remington was the first 6.5 mm cartridge with a medium length case. It provides very similar ballistics compared to the 6.5 Creedmoor, but with less pressure due to the larger case capacity.

For tactical applications, Lapua offers the .260 Rem. ammunition packed to meet military requirements loaded with OTM bullets.

Tactical bullets

Ballistic coefficient

For ultimate accuracy and precision, Lapua uses radar based data for all tactical projectile ballistics.

SCENAR

Scenar is an extremely accurate open-tip match bullet. The boat tail base provides an outstanding ballistic coefficient. Lapua Scenar bullets give superb results at long ranges.

D46

Often copied, never equaled. The legendary D46 in caliber 7.62 is one by which all others of its type are measured. Manufactured to the strictest tolerances for concentricity, uniformity of shape and weight, it has shot its way to the record books since the 1930's.

LOCK BASE

Unbeatable accuracy over extra long distances. Lock Base tail structure provides exceptional accuracy also at high pressures and high muzzle velocities. FMJBT configuration reduces drag and provides a flatter trajectory.

SUBSONIC

Lapua is the most widely used 7.62 mm caliber subsonic ammunition for military and law enforcement special operations. Designed especially for specialized short barrelled tactical rifles that have sound suppressors.

NATURALIS (SOLID)

Innovative bullet design enables controlled expansion with 100% retention weight. Bullet construction with valve design offers a maximal shock effect over the wide terminal velocity range (500-1000 m/s). For operational purposes the solid frame construction enables a straight bullet path through laminated glass without fragmentation.

AP

Lapua's AP is the most accurate armour piercing ammunition that is manufactured using proven match grade technology. It provides excellent penetration against hard targets. Now available also in the 300gr family, and for 6.5 mm caliber solutions.

API

Designed to be used against vehicles and structures in situations when excellent penetration, incendiary and point of impact effect are needed. The API bullet is designed to meet current insensitive munitions concerns.

The Lapua Ballistics App is available for Android and iOS mobiles free of charge. Language options: English, German, Finnish, Norwegian, Polish, French, Spanish and Afrikaans.

Lapua Ballistics is the ultimate 6DOF ballistics tool for mobile devices. Lapua Ballistics is the first mobile ballistics app utilizing the 6DOF calculation model, which makes it the most accurate ballistics app on the market. Lapua Ballistics always offers the latest, Doppler proven Lapua cartridge and bullet data for you to combine with your firearm and local weather information. The app also includes the option to define custom bullets manually.

The Ultimate Ballistics calculator LAPUA BALLISTICS APP

Features

- Utilizes 6DOF, the most accurate calculation method
- Always available with latest Lapua cartridge / bullet information •
- Quick and easy to change inputs like distance, wind speed and angle •
- Several result outputs available depending on your needs; numerical, reticle, • table and graph views
- Share your calculation results with your friends

Manage rifle / Cartridge data

- Create and clone your own firearm / reticle combinations
- Choose between metric and imperial values •
- Set Point Blank-range to different sight-in distances and impact windows
- Set Aiming point to moving target •
- Add custom bullets (calculations based on BC G1 or G7 and Siacci method) • • Pre-set max 4 powder temperature – V0 pairs to the same cartridge to
- correct powder temperature sensitivity • Features eg. Sight-in-POI, Coriolis, Max Range and Cant Angle calculation
- Compare up to 3 Lapua cartridge/bullet performances to each other
- Custom trajectory tables

The latest version of the Lapua Ballistics app is available for Android and IOS users, including new features. Please check lapua.com/resources/lapua-ballistics-app/ for details.
